Project Title: Development of AI Skill Modules & Agent Framework

Client: WESTCOST MODERN

Contractor: Matthew A. Cottrell

1. Project Objective

To design, document, and implement modular AI skill sets (`skills.md`) and a cohesive agent configuration (`agent.md`) to automate and standardize the selection of the hero image from a batch of real estate property photos.

2. Deliverables

- **Skill Modules (`skills.md`):** Development of [Number] distinct AI skill files. Each file will include:
 - **Logic Definition:** Clear, repeatable logic paths for specific tasks.
 - **Input/Output Schemas:** Standardized formats for processing data.
 - **Contextual Constraints:** Rules for maintaining brand voice, technical accuracy, or design guidelines.
- **Agent Configuration (`agent.md`):** Development of a primary agent framework containing:
 - **Orchestration Logic:** Instructions on how the agent calls upon the specific `skills.md` files.
 - **Persona/Role Definition:** Behavioral parameters for the agent.
 - **Execution Workflow:** The end-to-end process from input trigger to final output.

3. Timeline

- **Phase 1 (Drafting):** [Date] – Initial structure of `agent.md`.
- **Phase 2 (Skills Development):** [Date] – Delivery of draft `skills.md` files.
- **Phase 3 (Review/Refinement):** [Date] – Iterative adjustments based on client feedback.

Consulting Agreement
